

## SAVE TIME TRANSFORMING TAX DATA AUTOMATICALLY

### DATA MANAGEMENT CHALLENGES

Tax departments are losing time gathering tax data from disparate systems and other departments, only then having to reformat and manipulate the data into meaningful output. This disjointed process is not only inefficient and leaves margin for error, but it also underutilizes the talent of your tax accountants.

GTMpower™ is a tax data automation system that allows users to quickly transform large volumes of data into useable formats for provision, compliance, state apportionment, and other tax disciplines.

Make the “lost time” of data hunting and gathering a thing of the past. Transform your tax department from numbers crunchers to tax strategists, and deliver more value to your company’s bottom line, with GTMpower™.

### EMPOWER YOUR TAX DEPARTMENT

- ▶ Affordable solution for any size tax department
- ▶ Automates processing of data based on rules-driven approach
- ▶ SQL database provides scalability required for massive datasets
- ▶ Configurable data validation methods
- ▶ Flexible import allows for multiple sources and formats
- ▶ Period and scenario indicators to create organization for historical reference
- ▶ Web-based user interface that integrates with Microsoft Excel
- ▶ Options for hosting: internal or cloud-based

### USE CASES

- ▶ Data analysis for Forms 5471 & 5472
- ▶ Transfer pricing
- ▶ Sales and use tax compliance
- ▶ State apportionment
- ▶ Planning & scenario modeling
- ▶ Trial balance management
- ▶ Foreign Tax Credit and Section 199
- ▶ Replacement of unmanageable Excel spreadsheets and Access databases
