

## WHAT YOU GET:

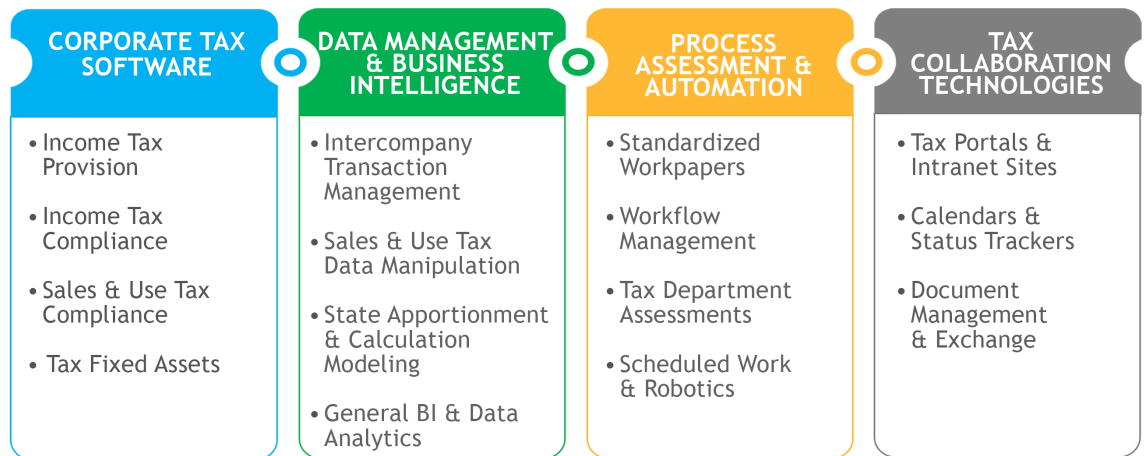

- Technology tailored to fit your specific needs
- A practical approach that implements best-in-class, sustainable solutions
- Maximized workflows, improved productivity, and streamlined operations
- Ongoing access to tax technology experts

## TAX AUTOMATION SERVICES (TAS)

Are you getting maximum value from your tax technology? For many reasons, tax technology is often underutilized – or unused altogether – within corporate tax departments.

GTM's Tax Automation Services (TAS) practice helps you get the return you expect from your investment.

Our tax automation team specializes in implementing, enhancing, and maintaining tax technology for large, multinational organizations. We take a flexible, individualized approach, working side-by-side with you to address your specific challenges and implement value-added solutions in all functional tax areas. GTM's team of experts work with the leading software applications on the market today, as well as emerging technologies.

Time is a precious commodity, especially if your tax team is already operating at peak capacity. Disjointed, manual processes increase risk, take time away from analyzing results, and leave data unstructured or hard to use. Technology can help, but it takes time to evaluate, implement, and refine ever-changing solutions.

Contact GTM today to put time back on your side.

As a member of Thomson Reuters' Certified Implementer Program (CIP) GTM is included in an elite group of service firms. This designation provides GTM with ongoing training, certification, and technical support for the Thomson Reuters ONESOURCE Direct Tax Product Suite.
